

Table 1: Demographic characteristics of women with and without evidence of pelvic endometriosis (n = 1341)

Category/term		Endometriosis +ve (n = 66) n (%) *median (range)	Endometriosis –ve (n = 1275) n (%) *median (range)
Age		33 (23 - 44)*	33 (16 - 51)*
BMI		23.8 (16.6 – 36.2)*	23.3 (15.8 - 56.2)*
Smoking		3 (4.5)	90 (7.1)
Ethnicity	Caucasian	40 (60.1)	648 (50.1)
	South Asian	8 (12.1)	107 (8.4)
	Afro-Caribbean	4 (6.1)	94 (7.4)
	East Asian	4 (6.1)	42 (3.3)
	Mixed/other	10 (15.2)	384 (30.1)
Parity	0	46 (69.7)	721 (56.5)
	1	16 (24.2)	340 (26.7)
	2+	4 (6.1)	214 (16.8)
Gravidity	1	30 (45.5)	517 (40.5)
	2	23 (34.8)	346 (27.1)
	3+	13 (19.7)	412 (32.3)
Past history of endometriosis		33 (50.0)	39 (3.1)
History of subfertility		14 (21.2)	95 (7.5)
History of miscarriage		20 (30.3)	453 (35.5)
History of recurrent miscarriage		4 (6.1)	40 (3.1)
History of ectopic pregnancy		4 (6.1)	78 (6.1)
